INSTRUCTIONS:

- Slide front toes #5, into end shoes #2 & center shoe #2A.
 - Slide back toes 5A & bolt it to upright #1 & #1A, using nuts and bolts, #5B
 - Place End See-thru Frame #15, between the upright tabs #1B, and rest it on the peg stop clip #1C. (See-thru frame is to be cased in every other section. Not need in center, add-on section.)
 - Place see-thru frame vertical end-upright caps #16, over vertical bars of the 3/4"sq. tubing frame #15, and rest them on the bottom of the horizontal bar of the See-thru frame.
 - Center Unit without frame. Place the center vertical upright caps #16A, over uprights #1A, and rest on peg stop clip #1C.
 - Screw on see-thru end top cap with U's #18, over frame #15.
 - Screw on see-thru center top cap with tabs #18A, over unit uprights #1A without frame.
 - Level the unit with leveling screws #9.
 - Hook in base shelves #6, into uprights and rest it on front shoes #5.
 - Insert base filler caps #17 and #17a, between base shelves #6.
- * See-Thru Wall Units base filler caps are narrower #17B

For Starter Unit: See-Thru End Top Cap with U's

For Add-On Unit: See-Thru Center Top Cap with Tabs

For Wall Unit: See-Thru Frame Base Filler Cap.
