

^{101A} Handy Store Fixtures Assembly Instructions for Securing Wall Unit into Wall (INST 101A)

PLEASE NOTE:

Wall Units *under* 96" in height will require 1 firing strip per section. Wall Units *over* 96" in height will require 2 firing strips per section.

- 1) Attach Wall Shelving to the wall with 1- 5/4" x 4" firing strip like shown. The firing strips must be firmly secured to the existing wall using the appropriate, accepted construction methods for that particular type of wall.
- 2) The screws securing the furring to the wall must be screwed into the studs in the wall. (*not just into the sheet rock*)
- 3) Furring strips have to be 1/2" shorter than the Wall Unit. Locate the firing strip approx. 12" down from the top of the Upright.
